| Date: | e:, Total Marks: 10, Marks Obtained:, | , Quiz: | | | | |
| | . Read the paragraph and answer the given questions. | | | | | |
| a single ch | centre of a PC is the processor, also called the CPU, or centip which executes program instructions and coordinates the ter system. The chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of silicon with a continuation of the chip itself is a small piece of the chip itself is | e activities that take place within | | | | |
| The proces | ssor consists of three main parts. | | | | | |
| | I unit examines the instructions in the user's program, integrand the rest of the components – monitor, disk, etc. – to α | · | | | | |
| The arithm OR, NOT). | etic login unit performs mathematical calculations (+, -, et | c.) and the logical operations (AND, | | | | |
| program c | ers are high-speed units of memory used to store and controunter, or PC) keeps track of the next instruction to be perinstruction register or IR) holds the instruction that is being | formed in the main memory. The | | | | |
| A. | Suggest a suitable title for the paragraph. | | | | | |
| В. | What is called the nerve centre of a PC? | | | | | |
| C. | What is an integrated circuit? | | | | | |
| D. | What are the three main parts of a processor? | | | | | |
| E. | AND, OR, NOT are which kind of operations? | | | | | |
| F. | Which part of the CPU performs +, – operations? | | | | | |
| G. | Write the two kinds of registers. | | | | | |
| H. | Write the short form of program counter. | | | | | |
| 1. | Which part of a processor keeps track of instructions to b | pe performed in the main memory? | | | | |
| J. | Which part of the processor holds instructions that are being executed? | | | | | |
