Printers / Types of Printers

A printer is a device that prints on paper, the information stored in electronic form. Printers can be used as a local printer as well as on a network. There are many kinds of printers: Laser printer, Inkjet printer, Dot-Matrix printer, Plotter, and Image Setter.

Modern printers have a lot of memory and processing speed. So, they can print pictures very fast and accurate. Inkjet, Laser, and Dot-Matrix printers are some of the most commonly used printers.
